

ALUMINIUM-COVERED ELEGANCE

The Clear collection's special feature is the aluminium-covered outer surface. Clear's frame structure and inner surface are made of very durable and close-grained pine. The varnished wooden surface in particular will give the space its own aesthetic feel. Clear's design is elegant and timelessly stylish.

In addition to glass sliding door, the collection includes fixed windows that are equal to the glass sliding door in both design and technical features.

Standard colour options for aluminium covering

- Dark grey (RAL 7024 matte)
- White (RAL 9010 matte)
- Black (RAL 9005 matte)

Width a maximum of 10,000 mm
Door leaf width a maximum of 2,000 mm
Height a maximum of 2,990 mm

In cases of special measurement needs, contact Profin Oy's sales department

Note! When the height is 2,750 mm or more, transportation must be agreed separately

Wooden structures of pine, alternatively of oak

Frame depth 210 mm

Frame thickness 54 mm, threshold 45 mm

U value

- 2,000 x 2,180 mm = 0.78 W/m²xK
(Size pursuant to the CE marking's requirements)
- 3,000 x 2,300 mm = 0.71 W/m²xK
- 4,000 x 2,600 mm = 0.67 W/m²xK

Sound insulation depending on the type of glazing Rw+Ctr 29–38 dB, in cases of special needs contact the sales department of Profin Oy

Glazing 3K

Glazing is determined to be in accordance with the site's building regulations

Feature	Standard	Category
Air tightness	EN 12207	4
Rain-resistance	EN 12208	E1500
Wind-pressure-resistance	EN 1210	C5

*) VTT-S-00344-18

MORE THAN A SLIDING DOOR

FINNISH EXCELLENCE

Profin has over 20 years of experience in manufacturing glass sliding doors in Northern Finland. They are exported annually to over 30 countries, including the demanding markets of Japan and Russia.

DURABILITY OF WOOD

Profin makes its products of long-lasting, close-grained pine. The other raw material option is oak. Using wood as the raw material means good structural values, be it thermal transfer or decibel values.

PREMIUM QUALITY

Profin's glass sliding door opens your home for broad horizons and a new sense of cosyness with light, space and a view that changes together with the seasons. A glass sliding door efficiently connects indoor and outdoor spaces allowing more diverse use of space.

In addition to their durability and long lifecycle, Profin products are beautiful, technically well-functioning and easy to use.
